

NEW available Q1/23

proD5™

proD5™ - 4G/5G combiantenna

Multifrequency Antenna FM/TV, 2xMiMo-WLAN, 2xMiMo- 4G/5G, active GNSS

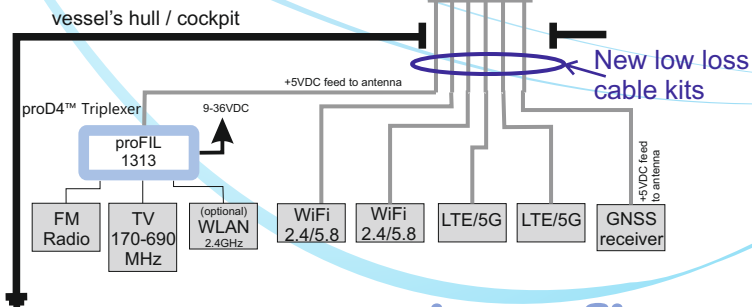

- proD5™ is a new member in the proD4™ family with upgraded 5G and MIMO capabilities
- Its terrestrial TV and FM radio broadcast reception incorporates improved interference filtering against LTE and WiFi noise
- Its new WiFi antennas are cross polarized and supports both 2.4GHz and 5.8GHz band operation. Optionally 2.4GHz only WiFi is available through the proFIL1313. Two WiFi antennas enable MIMO reception
- Mobile network reception is further improved by adding two cross polarized LTE and 5G antennas for MIMO reception (complete list of supported 5G bands available later)
- Drop-in-replacement with existing proD4™ installations (requires only additional cables for full support)
